

EXPONENTIAL LEADERSHIP MASTERCLASS

PREPARING LEADERS WITH THE MINDSET TO NAVIGATE THE 4TH INDUSTRIAL REVOLUTION

The Fourth Industrial Revolution is the advent of exponential technology which requires entirely new capabilities for human beings in the workforce.

This introduces us to a volatile, unpredictable world where our traditional pillars of organisational stability, strategy, business models, and capabilities are being continually challenged. We believe that there is great opportunity inherent in this volatility, but organisations are at risk of losing their way if they hang on to old models of success. The New Ways of Work will be our greatest lever in the New World of Work.

Optimising internal strengths and executing a good strategy is no longer enough. To succeed, organisations have to make a skill shift be more agile, adaptive and able to accelerate. In order to develop the metaskills required a new mindset is needed.

The Duke CE 'Exponential Leadership Experience' speaks to the mindset and metaskills that allows us to navigate the 4th Industrial Revolution. We explore how we can engage with Exponential Technology which allows human beings to thrive. The shift in mindset is the catalyst for the metaskills to prepare Leaders for *What's Next*.

To support our organisations through this volatility Duke CE has designed a **Masterclass on Exponential Leadership** for the following skills shift:

- High Performance Culture for New Ways of Work
- Challenge current mental models and prepare leaders for the New World of Work
- Understand the mindset and skills shift required for the 4th Industrial revolution
- Explore behaviours required to adjust to change within the context of Exponential Leadership
- Understand leadership agility and adaptability

Let Duke CE prepare your organisation through the Exponential Leadership Masterclass to leverage our 'Human Difference' for our future.
